

WHAT DO YOU THINK?

First, let's make sure we understand the meaning of these words:

Environment: *it is everything around us. All our surroundings including the air, soil, water, plants, and animals make up the environment. Plants and animals need a healthy environment to survive.*

Fossil fuels: *they are fuels that come from very old life forms that decomposed over a long period of time. The three most important fossil fuels are coal, petroleum, and natural gas. ... These fuels are called fossil fuels because they are dug up from underground.*

Pollution/Contamination: *It happens when the environment is contaminated, or dirtied, by waste, chemicals, and other harmful substances.*

Now, tell us... Give complete answers.

1. What will happen if we pollute the oceans?

If we pollute the oceans _____

2. What will happen if we continue to burn fossil fuels?

3. What will happen if we don't protect the rainforests?

4. What will happen if we don't recycle?

5. What will happen if we plant more trees?

Can you think of two more conditional sentences explaining about environmental problems or actions we can take?

1. If we

2. If we
