

Weathering and Erosion

1.- Watch the following video ABOUT Weathering and Erosion:

2.- Write the examples in boxes into the correct columns.

WEATHERING	EROSION

A rock is worn down during a sand storm

Rain washes away small pieces of rock.

Sand and silt act like sandpaper on a stone.

The farmer's topsoil is blown away during a hurricane.

Ice causes potholes in roads and streets.

A mudslide causes mud to block the road.

Pebbles move down a stream with the current.

The Colorado River carves the Grand Canyon.

The river overflows its banks and leaves behind clay.

A driveway has been cracked by tree roots.
