

LATIHAN PDPR MATEMATIK: TUKAR PECAHAN TAK WAJAR DAN NOMBOR BERCAMPUR

Nama: _____

Kelas : _____

A) Tukarkan nombor bercampur kepada pecahan tak wajar.

1. $\frac{4}{3} =$

 =

	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	
	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	

4. $\frac{22}{7} =$

 =

	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	
	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	

2. $\frac{10}{4} =$

 =

	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	
	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	

5. $\frac{30}{8} =$

 =

	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	
	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	

3. $\frac{19}{5} =$

 =

	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	
	<table border="1" style="display: inline-table; vertical-align: middle;"><tr><td></td></tr></table>	

B) Tukarkan pecahan tak wajar yang berikut kepada nombor bercampur.

1. $5\frac{1}{4} = \frac{\boxed{}}{\boxed{}}$

3. $1\frac{1}{9} = \frac{\boxed{}}{\boxed{}}$

2. $9\frac{5}{6} = \frac{\boxed{}}{\boxed{}}$

4. $2\frac{3}{10} = \frac{\boxed{}}{\boxed{}}$
