

UNIT 4.3 MENSTRUATION

(A) Drag and drop the correct menstruation phases on the space provided

Fertile Phase

Premenstrual Phase

Repair Phase

Menstruation Phase

(B) Match the right term with its definition

Repair Phase

A matured ovum will be released (ovulation)

Premenstrual Phase

Uterine lining continues to thicken and highly rich in blood vessels. Menstrual cycle repeats if fertilization doesn't happen

Fertile Phase

Uterine lining, blood, mucus and unfertilized ovum discharged from body through vagina

Menstruation Phase

The wall of uterus will start to rebuild and thicken. Blood vessels are formed
