

## Repeated Addition

Return to the first worksheet in this series to help you do this page.

1) 3 bicycles having 2 wheels each = 6 wheels in all  
 3 groups of 2 each = 6 in all

$$\begin{array}{c} \bullet \\ \bullet \end{array} \quad + \quad \begin{array}{c} \bullet \\ \bullet \end{array} \quad + \quad \begin{array}{c} \bullet \\ \bullet \end{array} \quad = \quad 6$$

2) 2 bicycles having 2 wheels each = 4 wheels in all  
 2 groups of 2 each = \_\_\_\_ in all

$$\begin{array}{c} \bullet \\ \bullet \end{array} \quad + \quad \begin{array}{c} \bullet \\ \bullet \end{array} \quad = \quad \underline{\hspace{2cm}}$$

3) 4 bicycles having 2 wheels each = \_\_\_\_ wheels in all  
 \_\_\_\_ groups of 2 each = \_\_\_\_ in all

$$\begin{array}{c} \bullet \\ \bullet \end{array} \quad + \quad \begin{array}{c} \bullet \\ \bullet \end{array} \quad + \quad \begin{array}{c} \bullet \\ \bullet \end{array} \quad + \quad \begin{array}{c} \bullet \\ \bullet \end{array} \quad = \quad \underline{\hspace{2cm}}$$

4) 5 groups of 2 each = \_\_\_\_ in all

$$\begin{array}{c} \bullet \\ \bullet \end{array} \quad + \quad \begin{array}{c} \bullet \\ \bullet \end{array} \quad = \quad \underline{\hspace{2cm}}$$

5) 7 groups of 2 each = \_\_\_\_ in all

$$\begin{array}{c} \bullet \\ \bullet \end{array} \quad + \quad \begin{array}{c} \bullet \\ \bullet \end{array} \quad = \quad \underline{\hspace{2cm}}$$
