

Year 4 Science - Term 3 Week 8 Lesson 1

LO: How does sound travel to the ear

Drop and drag the pictures in the order it reaches the ear.

Step 1	Step 2	Step 3	Step 4	Step 5
 The vibrations pass from particle to particle.	 Vibrations pass from the sound source to particles in the air around it.	 The vibrations reach your ear, and pass into your ear.	 The sound source begins to vibrate.	 The vibrations are changed into electrical signals and sent to your brain. Your brain tells you that you are hearing a sound!
