

1. Sean los polinomios:

$$A = 3x^2 - 5x + 1 \quad ; \quad B = 2x^2 + 3x + 3 \quad ; \quad C = x^2 + 4x + 4$$

Calcula: *(recuerda poner los signos + o -)*

$$B + C = \boxed{}x^2 + \boxed{}x + \boxed{}$$

$$\bullet \quad A + B + C = \boxed{}x^2 + \boxed{}x + \boxed{}$$

2. Sean los polinomios

$$A = 2x^3 + 4x^2 + x - 1 \quad ; \quad B = 3x^3 - 5x^2 + 3 \quad ; \quad C = 7x^3 - 3x + 2$$

Calcula: *(recuerda poner los signos + o -)*

$$\bullet \quad A + B = \boxed{}x^3 + \boxed{}x^2 + \boxed{}x + \boxed{}$$

$$\bullet \quad A + B + C = \boxed{}x^3 + \boxed{}x^2 + \boxed{}x + \boxed{}$$
