Most people who spend a holiday travelling take a camera with them and photograph anything that interests them — sights of a city, views of mountains, lakes, waterfalls, men and women, children, ruins of ancient buildings, and even birds and animals. Later looking through their albums they will remember the happy time they have had, the islands, countries and cities they have seen.

B. Рубрика:

Of course, different people dream of different things. Someone wishes a calm and quiet life; others imagine their life as a never-ending adventure. The majority dream of something concrete: a villa in some warm place, an account in a Swiss bank, a splendid car... It's interesting to know what the dreams of people who already have all this are. Celebrities, as we know, never hide their unusual hobbies, and often shock us with their extravagant behaviour.

The seas are in danger. They are filled with poison like industrial, nuclear and chemical waste. The Mediterranean Sea is already nearly dead; the North Sea is following it. The Aral Sea is on the brink of extinction. If nothing is done about it, one day nothing will be able to live in the seas. Every ten minutes one species of animal, plant or insect dies out forever.

E. Рубрика:

Imagine that you are preparing a project with your friend. You have found some interesting material for the presentation and you want to read this text to your friend.
You have 1.5 minutes to read the text silently, then be ready to read it out aloud.
You will not have more than 1.5 minutes to read it.

Many people have pets. Those of us who do have pets certainly love them very much. We become so close to our pets that we start to believe animals share human emotions. Well, your pet may not be able to feel all the emotions you can feel. However, animals and people share some of them. One of such traits is laughter. The theory that some animals like dogs, rats and apes can laugh was developed as long ago as 1872.

Modern scientists have recently proved that most animals emit certain sounds in response to pleasure. You can hear such sounds when animals are playing with one another or with toys or when we tickle them. This sound is laughter. Of course, the sound of a laughing dog will be much different from the human laughter. It is nice to know our pets can laugh. Perhaps what they can laugh at is still a better mystery, though.
