

WOOD PROPERTIES

1. Write if the following sentences are true or false:

- A. Wood has good mechanical resistance.
- B. Wood is denser than water.
- C. Wood provides good thermal insulation.
- D. Wood is used to conduct electricity.
- E. Wood can absorb or emit liquids or gases because it has tiny holes, called pores.

2. Join each of these properties with its description:

Renewable

We can make other things from it.

Biodegradable

Resource which can be used repeatedly and replaced naturally.

Recyclable

It decomposes as time passes.

3. Write if these sentences are true or false:

- A. Wood is recyclable, as we can make other things from it such as prefabricated boards, paper and cardboard.
- B. Wood is not renewable because if we cut down all trees, wood will disappear.
- C. Wood is not biodegradable because it can last for a long time.

4. Think if the following materials are renewable, biodegradable and recyclable or not and write YES or NOT:

MATERIALS	RENEWABLE	BIODEGRADABLE	RECYCLABLE
WOOD			
PLASTIC			
CERAMIC			
ALUMINUM			
GLASS
