

Calcula el área y perímetro de las siguientes figuras.

La **P** significa perímetro y la **A** significa área.

Para que no haya error primero anota las medidas del largo y después las medidas del ancho.

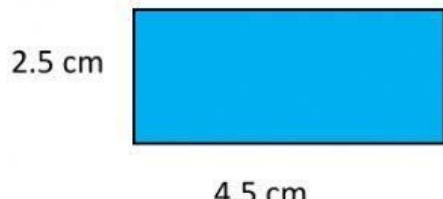

$$P = (2 \times 8) + (2 \times 5)$$

$$P = 16 + 10$$

$$P = \underline{\hspace{2cm}} \text{ cm}$$

$$A = 8 \times 5$$

$$A = \underline{\hspace{2cm}} \text{ cm}^2$$

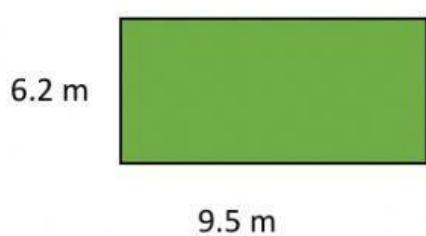

$$P = (2 \times 4.5) + (2 \times 2.5)$$

$$P = 9.0 + 5.0$$

$$P = \underline{\hspace{2cm}} \text{ cm}$$

$$A = 4.5 \times 2.5$$

$$A = \underline{\hspace{2cm}} \text{ cm}^2$$

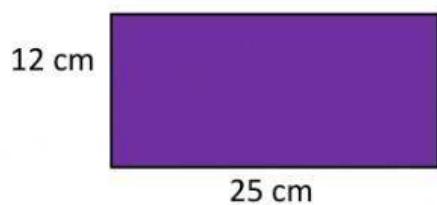

$$P = (2 \times 9.5) + (2 \times 6.2)$$

$$P = \underline{\hspace{2cm}} + \underline{\hspace{2cm}}$$

$$P = \underline{\hspace{2cm}} \text{ cm}$$

$$A = 9.5 \times 6.2$$

$$A = \underline{\hspace{2cm}} \text{ cm}^2$$

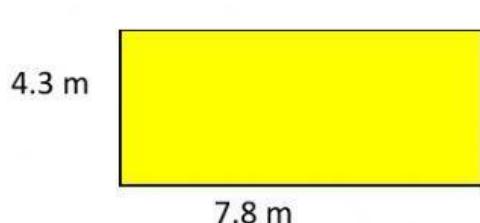

$$P = (\underline{\hspace{1cm}} \times \underline{\hspace{1cm}}) + (\underline{\hspace{1cm}} \times \underline{\hspace{1cm}})$$

$$P = \underline{\hspace{2cm}} + \underline{\hspace{2cm}}$$

$$P = \underline{\hspace{2cm}} \text{ cm}$$

$$A = \underline{\hspace{1cm}} \times \underline{\hspace{1cm}}$$

$$A = \underline{\hspace{2cm}} \text{ cm}^2$$

$$P = (\underline{\hspace{1cm}} \times \underline{\hspace{1cm}}) + (\underline{\hspace{1cm}} \times \underline{\hspace{1cm}})$$

$$P = \underline{\hspace{2cm}} + \underline{\hspace{2cm}}$$

$$P = \underline{\hspace{2cm}} \text{ cm}$$

$$A = \underline{\hspace{1cm}} \times \underline{\hspace{1cm}}$$

$$A = \underline{\hspace{2cm}} \text{ cm}^2$$
