

## Practice

### Subtract.

1. 
$$\begin{array}{r} 4.7 \\ - 3.2 \\ \hline \end{array}$$

2. 
$$\begin{array}{r} 8.9 \\ - 2.5 \\ \hline \end{array}$$

3. 
$$\begin{array}{r} 7.84 \\ - 6.31 \\ \hline \end{array}$$

4. 
$$\begin{array}{r} 9.79 \\ - 5.16 \\ \hline \end{array}$$

5. 
$$\begin{array}{r} 41.56 \\ - 14.81 \\ \hline \end{array}$$

6. 
$$\begin{array}{r} 59.27 \\ - 28.93 \\ \hline \end{array}$$

7. 
$$\begin{array}{r} 38.28 \\ - 26.57 \\ \hline \end{array}$$

8. 
$$\begin{array}{r} 67.35 \\ - 48.72 \\ \hline \end{array}$$

9. 
$$\begin{array}{r} 74.117 \\ - 29.585 \\ \hline \end{array}$$

10. 
$$\begin{array}{r} 87.68 \\ - 52.99 \\ \hline \end{array}$$

11. 
$$\begin{array}{r} 38.046 \\ - 19.787 \\ \hline \end{array}$$

12. 
$$\begin{array}{r} 51.168 \\ - 38.274 \\ \hline \end{array}$$

### Copy and subtract.

13.  $8.36 - 4.51$

14.  $12.97 - 7.83$

15.  $19.21 - 11.75$

16.  $27.36 - 18.58$

17.  $73.09 - 5.78$

18.  $35.59 - 14.96$

19.  $68.25 - 19.68$

20.  $40.65 - 29.76$

21.  $92.17 - 37.82$

22.  $80.034 - 27.389$

23.  $73.17 - 29.98$

24.  $53.706 - 19.851$

## Problem Solving

### Solve each problem.

25. Jim's long jump measured 4.26 meters. Dave's was 5.03 meters long. How much longer was Dave's jump?

26. A paint can held 5.36 liters of paint. The handyman poured out 4.75 liters. How much paint was left in the can?

27. A pair of slacks costs \$29.79. A shirt costs \$7.95. How much will one pair of slacks and two shirts cost?

28. How much change will be left if a suit costing \$89.50 is paid for with \$100 bill?
