

[1] ಎರಡು ಅಂಕಗಳ ಎಪ್ಪು? ಸಂಖ್ಯೆಗಳು 3 ರಿಂದ ಭಾಗಿಸಲ್ಪಡುತ್ತದೆ?

ಪರಿಹಾರ: 12, 15, 18, .....99

ಇದು ಸಮಾಂತರ ಶ್ರೇಣಿಯೇ? ಹೌದು ಸಮಾಂತರ ಶ್ರೇಣಿ, ಇಲ್ಲ,

$$a = 12, d = 3, a_n = 99$$

$$\text{ಸೂತ್ರ} \quad a_n = a + (n - 1)d,$$

$$= + (n - 1)$$

$$\text{i.e.,} \quad - = (n - 1)$$

$$\text{i.e.,} \quad = (n - 1)$$

$$\text{i.e.,} \quad (n - 1) = -$$

$$(n - 1) =$$

$$n = +$$

$$n =$$

ಅಧ್ಯರಿಂದ ಎರಡು ಅಂಕಗಳ ಸಂಖ್ಯೆಗಳು 3 ರಿಂದ ಭಾಗಿಸಲ್ಪಡುತ್ತವೆ

[1] How many two-digits numbers are divisible by 3?

Solutions: The list of two digit numbers divisible by 3 is :

12, 15, 18, .....99

Is this is an A.P? Yes it is , Here,  $a = 12, d = 3, a_n = 99$

H.W

Formula  $a_n = a + (n - 1)d$

$$\text{We have} \quad = + (n - 1)$$

$$\text{i.e.,} \quad - = (n - 1)$$

$$\text{i.e.,} \quad = (n - 1)$$

$$\text{i.e.,} \quad (n - 1) = -$$

$$(n - 1) =$$

$$n = +$$

$$n =$$

There are two-digits numbers are divisible by 3

How many two-digits numbers are divisible by
