6. People are living longer in the United States. As a result, more and more middle aged adults are becoming caretakers of their aging parents. When their parents can no longer care for themselves, these adults stay at home to care for them in much the same way they cared for their own children. Playing the role of "parent sitter" is quite difficult and frustrating. For example, an aging parent may become blind. No longer able to see, the old person needs his or her children to perform many every day jobs. Another example is the parent who becomes brain damaged during the aging process. Natural roles are then reversed, as children are forced to care for their parents as if their parents were children.

The underlined words middle aged can be replaced by

- A. very young people.
- B. ancient people.
- C. very old people.
- D. people in their 50's.
