

Unit

6

The Solar System

What are the sun, moon, and planets like?

1 What can you see in the photos? Look, unscramble, and match.

1

usn _____

3

ssart _____

tpnales planets

onom _____

2

4

2 The sky. Read and circle.

The (1) **sun** / moon is a star. It is very big and bright. This means we can't see other (2) **moons** / stars in the sky in the day. Earth is a (3) **planet** / star. It moves around the (4) **sun** / moon. When our part of Earth faces away from the sun, it is night for us. We can see many (5) **moons** / stars in the night sky. The (6) **sun** / moon is big and bright in the night sky.

3 Match the descriptions and the words from 1. Write.

- 1 They move around the sun. Earth is one of them.
- 2 There are lots of these in the night sky.
- 3 It is bright in the sky in the day.
- 4 It looks big in the night sky.
