

DIS Term 3 Week 9 – Read and interpret line graphs

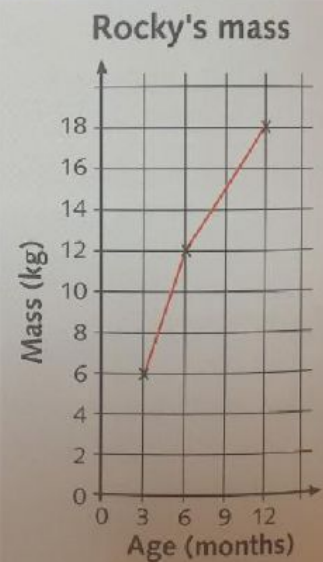

Use information presented in a line graph to solve problems

Challenge
1

1 The graph shows Rocky the puppy's mass from 3 months to 12 months. What was Rocky's mass in kilograms:

- a at 3 months? b at 12 months?

- 2 How much heavier was Rocky at 6 months than at 3 months?
- 3 What was the approximate mass of Rocky at 9 months?

1 The graph shows David's height measured in centimetres from the age of 9 to 17. What did David's height measure:

a at age 10?

b at age 14?

2 Between which ages did he gain 7.5 cm in height?

3 About how old was he when he measured 165 cm?

4 Use the information in the graph to write two different statements about David's height.
