My time capsule letter by Dex

Dear People of 2060,

I'm curious about transport in the future! The first photo you'll find in this time capsule is a photo of the bike which I got for my birthday. It's a great bike and I'm very proud of it.

The second photo is a photo of my favourite car. It's the car which James Bond drove under water! I think there will be cars in 2060, but they'll be faster and better for the environment than they are now.

The third photo is a photo of Neil Armstrong, who was the first man who walked on the moon! In 2060, I'll be an astronaut, and I'll travel to the moon in a space shuttle. I'll build a house on the moon, and my friends will come to visit me! I can't wait to explore space!
