The art of mixing

When you first go into a club and hear the loud, thumping music, you might be mistaken for believing that it all sounds the same. But the sounds that come from different DJs are as different as the DJs themselves. Although DJs are mixing other people's music, there is plenty of opportunity to insert their own creativity into the mix. Nowadays, just the style of the mixing can make DJs into recognised, and very wealthy, musicians in their own right. Successful DJs

don't only learn the technical aspects of mixing – they 'feel' the music. Most DJs would agree that training their 'ear' is the easy part – they can spend time listening to tracks over and over again to discover what the performers – and indeed, the sound engineers – have created. But, like in most other areas of life, some people are simply blessed with raw, natural talent. And, like in most other areas of life, these lucky few will become the most successful.

- According to the article, the writer made a mistake when he first went to a club
- The writer believes that the sounds that DJs create are all very similar.
- According to the writer, a DJs personal creativity can be heard in the tracks he/she plays.
- Some DJs have become famous by mixing music.
- Some DJs have made a lot of money from mixing music.
- The writer believes that the best DJs are the ones who listen to the most music.
