

Roxette – the first girl on the Moon

[Click here to listen to the song :-\)](#)

Complete the song with missing past simple verbs in the box.

brought could didn't let was told looked took

She the first girl on the moon

She didn't compromise

When she off that cold
afternoon

Heading for the northern skies

I told her I could come

That I come along

She was the first girl on the moon

I think I was her only fiend

She her ray-gun an old
harpoon

Just in case of accidents

I her I could come

That I could come along

She me come along

Wave goodbye, wave goodbye

She was the first girl on the moon

Standing tall, flag in hand

She around humming a tune

The strangest song known to man

I told her I could come

That I could come along

She never let me come along

Wave goodbye, wave goodbye
