HAD-row-SORE-us 'big lizard'

Type of dinosaur: **euornithomimid**

Length: 9.0m

Diet: **herbivorous**

When it lived: **Late Cretaceous**, 78-74 million years ago

Found in: **USA**

This was the hadrosaurus. It was a herbivore because it ate plants. It was bipedal because it walked on two legs. It lived in the USA 78 million years ago.

It was a very big dinosaur, but it wasn't dangerous. It was very peaceful.

It had a very big head and long arms. Its back legs were very strong and its tail was long. It had big eyes and a big mouth. It had blunt teeth.

The hadrosaurus was smaller than the T-rex. The T-rex's claws were more dangerous than the hadrosaurus claws.
