

Worksheet

Miss Mailin Castro Santos

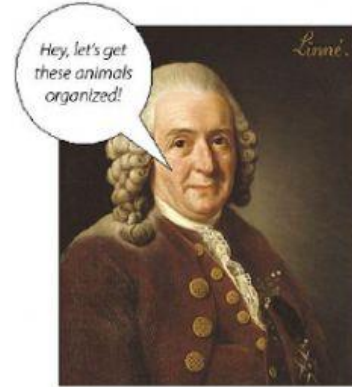

Unidad Educativa Bilingüe
Brisas del Río

1.- In the 18th century, who developed a system to organize living things?

Carolus Linnaeus

Cristóbal Colón

Charles Darwin

2.- Read the statement and choose TRUE if the information is right or FALSE if the information is wrong:

- Invertebrates are animals that do not have backbones
- Over 96% of all the animal species on Earth are vertebrates
- **Zoology** is the branch of biology that studies the variety of shapes, colors and sizes of the animal kingdom.

3.- Choose the group of animals that belongs to the VERTEBRATES

Amphibians

Worms

Reptiles

Fish

Birds

Cnidarians

Mammals

4.- Read the characteristics and match with the correct invertebrate's classification:

Have a hard outside covering exoskeleton.
Examples: insects, spiders, centipedes, crustaceans

Mollusks

Have a tough, spiny skin that protects their bodies.
Sea stars and sea urchins are examples

Arthropods

Have soft bodies as well, but most also have a thick outside shell. Oysters and snails are examples

Echinoderms

5.- Look at the picture and choose the corresponding classification
