

Operatoria combinada números enteros

Nombre:

Completa cada cuadro con la respuesta correcta, al finalizar tu guía presiona enviar.

a) $13 - 6 + 5 - 27 =$

The diagram shows the expression $13 - 6 + 5 - 27$ with lines connecting the numbers to boxes for intermediate results. A box is connected to 13 and 6. Another box is connected to the first box, 5, and 27. A final box is connected to the second box and 27.

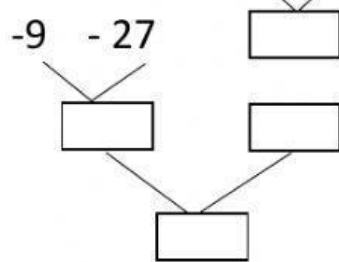

b) $(-7 \cdot 3) - 9 =$

The diagram shows the expression $(-7 \cdot 3) - 9$ with lines connecting the numbers to boxes for intermediate results. A box is connected to -7 and 3. Another box is connected to the first box and 9.

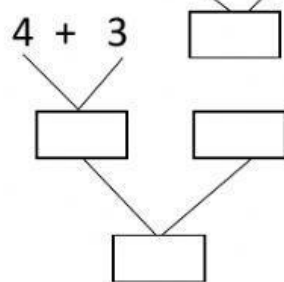

c) $(-50 : -5) + (-17 \cdot 2) =$

The diagram shows the expression $(-50 : -5) + (-17 \cdot 2)$ with lines connecting the numbers to boxes for intermediate results. One box is connected to -50 and -5. Another box is connected to -17 and 2. A final box is connected to the two intermediate boxes.

d) $-9 - 27 + (50 : -2) =$

e) $4 + 3 - 75 : -3 =$

f) $10 \cdot -5 - 10 - 60 : 3 =$
