

Separating Mixtures

1. Write the name of the separation methods:

filtration - magnetic separation - decantation - sieving - evaporation - distillation

2. Match the mixtures to the methods that you would use to separate them

Sand and stones

EVAPORATION

Pieces of plastic and pieces of metal

DECANTATION

Oil and water

MAGNETIC SEPARATION

Alcohol and water

SIEVING

Salt and water

FILTRATION

Dust and air

DISTILLATION
