Zebras' Stripes Stop Flies, Says Scientific Study

Why do zebras have stripes?

Scientists believe that a zebra's stripes confuse flies.

- To test this, they put striped coats on horses. They noticed that fewer flies landed on those wearing the coats.

Scientists believe they have found out why zebras have stripes. To find out why they put striped coats on horses.

In the wild, zebras short-haired coats make it more likely for flies to feed on their blood vessels. This can be fatal for them.

However, scientists believe a zebra's stripes prevent parasites from feeding on them. Parasites can be extremely bad for horses. If a parasite feeds on a horse, it can get an infection. This can lead to a horse developing a disease.

12. _____

13. _____

14. _____

15. _____

IV. Read the following chronicle and answer the questions.

INDEPENDENCE DAY

People in the United States celebrated the Independence Day yesterday, July 4th. I was with my cousins in Houston and I thought it would be like September 15th in Mexico but it was different. Here in the United States people celebrated with barbecues in their home and they watched the fireworks from there. In Mexico, we celebrated Independence Day in the "plaza" and we said "Viva México". We watched the fireworks there. We also ate "enchiladas" and "tacos" and wore big hats. There was one thing in common in both countries, we all displayed flags in cars and homes.

16. What's the title of the chronicle? _____
17. When did people in Mexico celebrate Independence Day? _____
18. How did people in the U.S. celebrate Independence Day? _____
19. Where did people in Mexico go to say "Viva México"? _____
