

## UNIT 4.4 FERTILISATION AND PREGNANCY

(1) Identify the statements below either true or false

- a) Embryo developed right after nucleus of sperm fuses with nucleus of ovum: \_\_\_\_\_
- b) Zygote divides and forms into embryo: \_\_\_\_\_
- c) It takes 10 months for zygote to grow into a baby: \_\_\_\_\_
- d) During Week 1- Week 4, the hands, arms and knee part of embryo has fully grown:  
\_\_\_\_\_
- e) During Week 10 - Week 19, embryo looks like a baby. It is now called as foetus:  
\_\_\_\_\_

(2) Match the right structure to its right function

Amnion

Transports blood to and from foetus

Placenta

Provide protective environment to foetus

Umbilical cord

Place where embryo implanted and grow

Uterine wall

Absorbs shock

Amniotic fluid

Exchange of oxygen and carbon dioxide, removal of waste material, supply of nutrient from mother to
