2.1.5 Menentukan nilai bagi pecahan wajar dan nombor bercampur daripada sesuatu kuantiti.

**Selesaikan pecahan di bawah ini**

1)  $\frac{3}{7}$  daripada 35 =

$$\begin{array}{l} = \frac{\square}{\square} \times \square \\ \hline = \square \times \square \\ \hline = \square \\ \hline = \frac{\square}{\square} \\ \hline = \square \end{array} \quad \text{L1}$$

2)  $\frac{5}{6}$  daripada 42 =

$$\begin{array}{l} = \frac{\square}{\square} \times \square \\ \hline = \square \times \square \\ \hline = \square \\ \hline = \frac{\square}{\square} \\ \hline = \square \end{array} \quad \text{L1}$$

3)  $\frac{5}{9}$  daripada 45 =

$$\begin{array}{l} = \frac{\square}{\square} \times \square \\ \hline = \square \times \square \\ \hline = \square \\ \hline = \frac{\square}{\square} \\ \hline = \square \end{array} \quad \text{L1}$$

4)  $\frac{1}{3}$  daripada 42 =

$$\begin{array}{l} = \frac{\square}{\square} \times \square \\ \hline = \square \times \square \\ \hline = \square \\ \hline = \frac{\square}{\square} \\ \hline = \square \end{array} \quad \text{L1}$$

5)  $\frac{2}{5}$  daripada 175 =

$$\begin{array}{l} = \frac{\square}{\square} \times \square \\ \hline = \square \times \square \\ \hline = \square \\ \hline = \frac{\square}{\square} \\ \hline = \square \end{array} \quad \text{L1}$$

6)  $3\frac{2}{7}$  daripada 49 =

$$\begin{array}{l} = \square \times \square + \frac{\square}{\square} \times \square \\ \hline = \square + \frac{\square}{\square} \times \square \\ \hline = \square + \frac{\square}{\square} \\ \hline = \square + \square = \square \end{array} \quad \text{L1}$$

7)  $2\frac{3}{4}$  daripada 36 =

$$\begin{array}{l} = \square \times \square + \frac{\square}{\square} \times \square \\ \hline = \square + \frac{\square}{\square} \times \square \\ \hline = \square + \frac{\square}{\square} \\ \hline = \square + \square = \square \end{array} \quad \text{L1}$$

8)  $3\frac{1}{7}$  daripada 112 =

$$\begin{array}{l} = \square \times \square + \frac{\square}{\square} \times \square \\ \hline = \square + \frac{\square}{\square} \times \square \\ \hline = \square + \frac{\square}{\square} \\ \hline = \square + \square = \square \end{array} \quad \text{L1}$$

9)  $2\frac{5}{9}$  daripada 207 =

$$\begin{array}{l} = \square \times \square + \frac{\square}{\square} \times \square \\ \hline = \square + \frac{\square}{\square} \times \square \\ \hline = \square + \frac{\square}{\square} \\ \hline = \square + \square = \square \end{array} \quad \text{L1}$$
