

Match the part of the lens with its definition by drawing lines between them

Serial No	Part of the lens		definition
1	<b>Centre of curvature</b>		Point at which parallel rays of light converge in a concave lens and parallel rays of light diverge from the point
2	<b>Focus</b>		Imaginary line that passes through the centres of curvature of a lens
3	<b>Principal Axis</b>		The distance between optical centre and centre of curvature
4	<b>Optical centre</b>		The distance between optical centre and principal focus
5	<b>Radius of curvature</b>		The centre of sphere of part of which a lens is formed
6	<b>Focal Length</b>		The central point of a lens
