Relationships are hard, but why?

https://www.youtube.com/watch?v=2xKXLPuju8U

1) Match the word/phrases to the descriptions.

a. *foxhole*	___a place designed to have fun
b. *hubris*	___ something that implies a mistake
c. *Fun house mirrors*	___ indicating balance in the distribution of something
d. *Misfire*	_____something that can be an attention getter
e. *Fair share*	___a negative personality trait
f. *Novelty*	___something used for protection and safety

2) Watch and listen the TED talk "Relationships are hard, but why?". Answer the questions about the lecture.

a. How does the brain distribute tasks between the "ambassadors" and the "primitives"?
b. Think of examples of your recent activity involving the use of these areas of the brain.
c. How are both brain areas characterized?
   Ambassadors are s_ _ _, s_ _ _ _ and d _ _ _ _ _ _ _ _ _.
   Primitives are f _ _ _, m_ _ _ _ _-b_ _ _ _ and a_ _ _ _ _ _ _ _.
d. Can these tips about relationships be applied to other kind of relationships?
e. Why isn't it advisable to argue without eye-contact?

3) These are phrases taken from the lecture. Read them and write examples following the prompts.

a. If I may be frank, they (the ambassadors)'re good at **making shit up**.
   Who else is good at making shit up?
b. The ambassadors have to **offload** newness to your primitives to conserve resources.
   What was the last thing you offloaded?
c. You can't possibly run your ambassadors in **full gear**.
   What time of the day are you in full gear?
d. Your perceptions are constantly **playing tricks on you**.
   Who else is constantly playing tricks on people?
e. Why do our fights **spin out of control**?
   What else spins easily out of control?
