Mix = \_\_\_\_\_ Shops= \_\_\_\_\_ Journalist= \_\_\_\_\_ Size= \_\_\_\_\_  
Rent= \_\_\_\_\_ Replaced= \_\_\_\_\_ Record= \_\_\_\_\_

#### A. Sony Walkman

In the 1980s many people had a Walkman. You could listen to a store bought cassette on it or make your own cassette 'mix' from the radio or from another cassette. These days we use MP3 players or smart phones. 30 years ago people were very excited when they could first walk along and listen to their favorite music.

#### B. VHS cassette

Similar to Music cassettes in how they worked, but much bigger, VHS cassettes were used for watching movies on your TV with a VHS player called a VCR. There were many rental shops to rent movies, or you could record your favorite TV shows from the TV. These days DVD players have replaced them.

#### C. Typewriter

Typewriters were invented in the 1830s and were used up until the 1980s, when they were replaced by computers. Many journalists and writers used them, but they are not as convenient as computers.

#### D. Vinyl record

Dating from around 1890 Vinyl records have tiny grooves and a needle on the record player reads the music. Vinyl records are still used today. Many DJs and music lovers still prefer their sound to a CD or a MP3. Vinyl records come in three common sizes and have three possible speeds.
