Jim: Dad. Can you help me? I have homework and I need help.
Dad: Sure Jim. What is the subject?
Jim: What should we do to save our planet?
Dad: Well first we should save energy.
Jim: Energy?
Dad: Yes we should save energy. We can use less water and electricity.
Jim: How?
Dad: Turn off the lights and electrical devices. Don't waste water.
Jim: Yes. I know. We shouldn't leave the water running and we should unplug the computer and the TV.
Dad: Yes you're right. In this way we spend less money on energy too.
Jim: What else?
Dad: Recycling. It saves energy and money. You can use the same thing again and again. To do this, first we should sort out the rubbish.
Jim: Yes, but how?
Dad: We should put glass, paper, plastic and metal in different bags. Then we should take them to the recycling bins.
Jim: Do you know the colors of the recycling bins Dad?
Dad: Yes. The green or the White bins are for glass. The blue bins are full paper. The yellow bins are for plastic and the grey bins are for metal.
Jim: Okay let's separate our garbage.
