Yes      no

5. What is the essential key to be successful?

Happiness      food      effort

## The psychology of self-motivation

**4) Order the sentences according to the appearance in the talk. Write numbers please.**

Will it work?

It's all in how you see it, it's your paradigm, it's how you communicate to others and how you communicate to yourself.

Now when I think of boundaries, I think of rules, regulations and restrictions.

Can you do it?

There is another word. It's called *empowerment*.

You feel competent at doing worthwhile work.

Now if you want to know if you feel empowered or if your child, your student, your worker feels empowered, ask them three questions.

I know if you're like me, I need supervisors, I need someone holding me accountable to do the right thing.

Is it worth it?

When you believe you have a sense of autonomy, a sense of choice in what you're doing, you'll feel more self motivated.
