

NAME:

READING ACTIVITY

Read

Read the magazine article. What is a "green vacation"?

VACATION OUTLOOK

Are you **fed up** with cold campsites and boring beaches when you go on vacations? Would you like to **wake up** to see tropical fish swimming past your window? Or how about going sightseeing in space? Some vacations **may not be** possible today, but in the future, who knows?

"I expect underwater vacations **will be** very popular in a few years. Right now, we have the world's first underwater hotel in Dubai. I'm sure there **will be** more in the future"

Grace Lee

Vacation, Vacation

"The first space hotel is planned for 2027. A three-day vacation in space **will not be** cheap. It **will cost** about \$4 million and **will include** eight weeks training on a tropical island! I don't think I **will ever go** into space, but my grandchildren **might go**"

Bruce mason

Break free

"I expect that in the future people *will take* "greener" vacations to protect the environment. They *will not fly* so often, and I don't think they *will travel* so far. More people *will go* camping or stay in small hotels *instead of* big hotels.

Laura Acevedo

First Stop

Comprehension

Answer the questions and complete sentences.

1. Where is there an underwater hotel?

2. How much will a three-day vacation in space cost?

3. Name two things people can do to make their vacations "greener."
