- f Who \_\_\_\_\_ you \_\_\_\_\_ next to in English class yesterday?

Score \_\_\_/12

### Reading

9 Read the text and circle T (true), F (false) or DK (don't know).

Everyone watches television. It's a big part of everyday life. Today, we have digital television and you can also watch TV shows on your personal computer. But do you know who invented the first television system and when it was invented? The Scottish engineer John Logie Baird is often known as 'the father of television' because he invented the world's first working television system. Baird was born near Glasgow, Scotland, in 1888. As a young man, he was very interested in technology. He studied at the West of Scotland Technical College and later at Glasgow University. Unfortunately, he did not complete his studies because World War I began in 1914. After the war, Baird moved to England and began working to develop a television system. In 1923, in the town of Hastings on the south coast of England, Baird transmitted a moving image for the first time and in 1925, he transmitted the world's first television picture. In 1927, Baird sent a long-distance television signal using telephone lines from London to Glasgow, a distance of 438 miles (705 kilometers) and the following year he sent a picture from London to New York. That same year the Baird Television Development Company made the first television program for the BBC. In 1939, Baird helped develop color television. He also invented a video recording system. He died in 1946.

- a John Logie Baird was born in England. T / F / DK
- b He studied at Glasgow University. T / F / DK
- c He married an American woman. T / F / DK
- d In 1923 he transmitted a moving image for the first time. T / F / DK
