

Drag and drop all related terms in one single column

Current

Voltage

$$R = \frac{V}{I}$$

$$I = \frac{V}{R}$$

I

V

Property of a conductor to resist the flow of charges through it

$$V = \frac{\text{joule}}{\text{coulomb}}$$

Resistance

Ampere

Volts

$$I = \frac{\text{coulomb}}{\text{second}}$$

$$R = \frac{\text{voltage}}{\text{current}}$$

$$V = I \times R$$

$$V = \frac{\text{work done}}{\text{charge moved}}$$

Work done to move a unit charge from one point to the other.

Ohms

R

$$R = \frac{\text{volt}}{\text{ampere}}$$

$$I = \frac{\text{charge}}{\text{time}}$$

Amount of charge flowing through a particular area in unit
