

7 NATURAL WONDERS OF THE WORLD

- a cinder cone volcano located in Mexico, which last erupted in 1952.

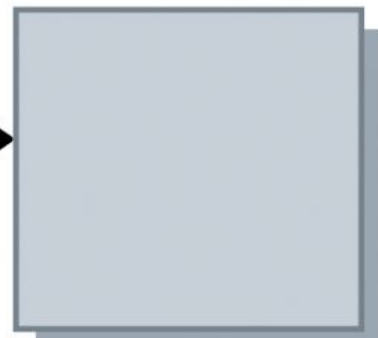

- The park is home to much of the immense Grand Canyon.

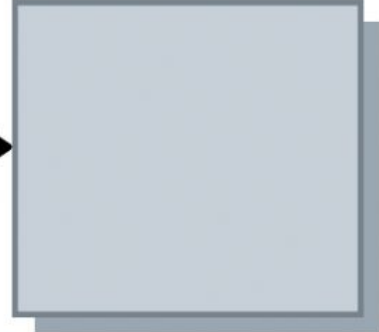

- the world's largest coral reef system.

- earth's highest mountain above sea level.

- considered to be one of the world's largest waterfalls.

- surrounded by granite mountains and pinnacles. It was created by erosion caused by the Atlantic Ocean.

- auroras, or naturally occurring phenomena that consist of colourful displays of light in the sky.
