

Cikgu Sue

Menambah pecahan dengan penyebut yang TIDAK sama. Berikan jawapan dalam bentuk pecahan termudah.

Contoh: $\frac{1}{4} + \frac{1}{2} \begin{array}{c} \boxed{\times 2} \\ \boxed{\times 2} \end{array} = \frac{\boxed{3}}{\boxed{4}}$ $\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$	$1) \frac{1}{4} + \frac{5}{8} = \frac{\boxed{}}{\boxed{}}$
$2) \frac{1}{5} + \frac{3}{10} + \frac{1}{10} = \frac{\boxed{}}{\boxed{}}$	$3) \frac{3}{8} + \frac{1}{4} + \frac{1}{4} = \frac{\boxed{}}{\boxed{}}$
$4) 1\frac{1}{10} + \frac{4}{5} = \boxed{} \frac{\boxed{}}{\boxed{}}$	$5) 1\frac{1}{3} + 6\frac{1}{6} = \boxed{} \frac{\boxed{}}{\boxed{}}$
$6) 2\frac{1}{2} + 7\frac{4}{10} = \boxed{} \frac{\boxed{}}{\boxed{}}$	$7) 6\frac{1}{2} + 3\frac{3}{8} = \boxed{} \frac{\boxed{}}{\boxed{}}$
$8) \frac{1}{3} + 4\frac{3}{9} + 1\frac{1}{9} = \boxed{} \frac{\boxed{}}{\boxed{}}$	$9) 2\frac{1}{2} + 1\frac{1}{10} + 7\frac{1}{5} = \boxed{} \frac{\boxed{}}{\boxed{}}$

Selamat Menjawab Murid-Murid
