

**Li Jing, Luke and Ranee talk about their ideas to make money.
Read what they plan to do.**

Li Jing

I want to sell wristbands. I will make them myself. I can make twenty wristbands in a month. I plan to sell them at RM6 each. I will need RM20 to buy the cord and RM50 to buy the beads.

My brother and I will collect tins for recycling. We will collect most of the empty tins ourselves. We will also ask our family and friends to help us. We need to spend RM3 on plastic bags to keep the tins in. One full bag of empty tins usually weighs about 1 kilogramme. We can get RM4 for each kilogramme. In a month we can fill five bags.

Luke

I plan to sell cookies. I will bake the cookies myself on Sundays. I can make eight bottles of chocolate cookies in a month. I have to buy eight containers at RM5 each. I also need to spend RM50 on the ingredients and another RM15 on labels and decorations for the bottles. I plan to sell the cookies at RM12 a bottle.

Ranee

Choose the correct answers.

1. Whose idea brings in the most revenue?
2. Whose idea brings in the least revenue?
3. Whose idea has the most expenses?
4. Whose idea has the least expenses?
5. How much are Li Jing's expenses?
