

Science — GRADE 8TH

# Photosynthesis

TEACHER: JEMIMA SANTOS

DRAG AND drop to complete the photosynthesis process.

Carbon dioxide  
Water and minerals  
Oxygen  
Sunlight  
Sugar

**Complete the PARAGRAPH to explain the photosynthesis process.**

The process in which plants produce their own food is called \_\_\_\_\_.

Photosynthesis takes place in the \_\_\_\_\_ of the plant.

During photosynthesis, the plant absorbs water through its \_\_\_\_\_, and \_\_\_\_\_

through its \_\_\_\_\_. The \_\_\_\_\_ in the leaf captures \_\_\_\_\_.

The products of photosynthesis are: \_\_\_\_\_ and \_\_\_\_\_.
