Transportation around the world

A gondola in Venice, Italy. Venice doesn't have any roads, so there are no cars. Instead, people travel by gondolas on the canal is like a road, except it is filled with water.

Tuk-tuks are like motorcycles, but they have three wheels. Tuk-tuk first became popular in Thailand. However, now you can see them in many cities around the world. Most people use tuk-tuks like taxis. They are a good way to travel in cities with lots of cars.

Traveling by dog sled is popular in countries near the North Pole. In some countries, like Norway and Sweden, some areas are covered in snow. It is impossible to use a car. Instead, people use sleds. A special type of dog called a husky pulls the sled. Huskies are strong and fast.

I. Please read the definition and write the word.
