

PROPIEDAD CONMUTATIVA

Si **CAMBIAMOS** los sumandos de orden el resultado es el mismo

$$42 + 23 = 23 + 42$$

Diagram showing the commutative property with arrows pointing from 42 and 23 to a yellow box containing 65, and from 23 and 42 to another yellow box containing 65.

$$22 + 13 = 13 + \square$$

Diagram showing the commutative property with arrows pointing from 22 and 13 to a yellow box, and from 13 and a square box to another yellow box.

$$103 + 24 = \square + \square$$

Diagram showing the commutative property with arrows pointing from 103 and 24 to a yellow box, and from a square box and another square box to another yellow box.

$$363 + 34 = \square + \square$$

Diagram showing the commutative property with arrows pointing from 363 and 34 to a yellow box, and from a square box and another square box to another yellow box.

$$509 + 18 = \square + \square$$

Diagram showing the commutative property with arrows pointing from 509 and 18 to a yellow box, and from a square box and another square box to another yellow box.

$$415 + 141 = \square + \square$$

Diagram showing the commutative property with arrows pointing from 415 and 141 to a yellow box, and from a square box and another square box to another yellow box.

$$122 + 58 = \square + \square$$

Diagram showing the commutative property with arrows pointing from 122 and 58 to a yellow box, and from a square box and another square box to another yellow box.
