

TYPES OF ECOSYSTEMS

1. Write these definitions below the correct column.

| | | | |
|--|---|---|---|
| Marine, freshwater and mixed ecosystems. | Forests and savannahs | Coral reefs | Marshes, lagoons of Doñana National Park. |
| It depends on the climate. | Sierra Nevada Park rivers in Andalucía. | Biodiversity rises from cold towards warm waters. | |

| LAND ECOSYSTEM | AQUATIC ECOSYSTEM |
|----------------|-------------------|
| | |
| | |
| | |
| | |
| | |

2. Drag the definitions to the correct term.

Lower biodiversity

Temperate climates and intermittent precipitations

Extreme climate, very hot or cold temperatures, few precipitations.

Very high levels of biodiversity

Warm and humid climates and abundant precipitations.

Higher levels of biodiversity
