Number:

READING: Western Astrology

In Western astrology, the *zodiac* is made up of a cycle of 12 star signs. The sky is divided into twelve equal parts and each part has a sign that represents a constellation (a group of stars.)

Each star sign is 30 or 31 days long and the cycle is one year. The zodiac starts on the Spring equinox, usually March 20 or 21 – it depends on the sun. This is the day when, on the equator, the sun and night are the same length.

The 12 star signs are: Aries the ram (a male sheep), Taurus the bull, Gemini the twins, Cancer the crab, Leo the lion, Virgo the virgin, Libra the scales, Scorpio the scorpion, Sagittarius the archer, Capricorn the goat, Aquarius the water, and Pisces the fish.

There are also four elements, and each element has three star signs. The four elements are: Fire (Aries, Leo and Sagittarius), Earth (Taurus, Virgo and Capricorn), Air (Gemini, Libra and Aquarius) and Water (Cancer, Scorpio and Pisces).

In Western astrology your *horoscope* is a description of what's going to happen to you in the future, based on the position of the stars and the planets when you were born. You can usually read these in the newspaper or a magazine.

Your personality also depends on your star sign. For example, people born under the sign of Cancer (21st June to 22nd July) are usually kind and romantic. When they trust people they can be very faithful. On the other hand, Cancerians are not always easy to understand and can sometimes be difficult to be with.

Cancerians are often good journalists, writers or politicians. They are very fond of food and eat a lot. They get along with Scorpions and Capricorns.

QUESTIONS: Fill in the blanks.

1. The zodiac is a cycle of 12 _____.
2. There are _____ star signs.
3. Each sign is about _____ long.
