SUB-EVS

CLASS- V

DATE- 20/07/2021

ACTIVITY

Five types of seeds are given in Column A. Their dispersal methods are given in column B. Match the columns.

Column A

- (i) Seeds are heavy
- (ii) Seeds are small in size
- (iii) Seeds are travelling long distances
- (iv) Seeds have hooks on them
- (v) Seeds are light

Column B

- (a) Animals eat the fruits and throw away the seeds
- (b) Some seeds are carried away by water
- (c) Fruits/seeds get stuck to animal skins or clothes of humans
- (d) Plants burst open the pods for seeds to spread
- (e) Seeds are blown by the wind
