

## Activity 5.1

After selecting the correct answer, drag and drop on the blank

නිවැරදි පිළිතුර තොරු හිස් තැන මතට ඇදගෙනගොස් කෙන්න

01. Decompose the following problem into simple parts and fill in the blank using mathematical relations in order to solve the problem easily.

$3 \times 8 = 24$

$5 + 6 = 11$

$24 \div 4 = 6$

Problem

$5 + \frac{3}{4} \times 8$

11

Solution

$3 \times 2 = 6$

$5 + 6 = 11$

$8 \div 4 = 2$

Problem

$5 + \frac{3}{4} \times 8$

11

Solution

$5 + 6 = 11$

$0.75 \times 8 = 6.0$

$3 \div 4 = 0.75$

Problem

$5 + \frac{3}{4} \times 8$

11

Solution

Note : Several solutions for above problem, there may be several solutions for other problem
