WRITING: AN OPINION ESSAY

In the 21st century the world will change very quickly. It's easy to be pessimistic, but I think we will find a way to survive.

First of all, scientists are always making new discoveries, like health treatments or how to grow food more efficiently. So we have a lot of ways to improve our lives. Secondly, I think people are starting to recycle more and produce less rubbish.

On the other hand, there will be difficulties. Climate change will cause extreme weather. This will be a problem all over the world. Countries should work together and governments must find a way to do this.

In conclusion, the future won't be easy but I think young people will be important. We need to work together to solve the world's problems. In my opinion, we can!

Look at the essay above. Then write your own opinion about the topic: "The world will be a more difficult place to live in the future".
