## Plant and Animal Classification

1.

Which of the following plants is a nonvascular plant?

- A. celery                      B. maple tree                      C. moss                      D. pine tree

2. Which of the following is an example of a seed bearing vascular plant?

- A. moss                      B. sunflower                      C. liverwort                      D. fern

3. Which of the following is a gymnosperm?

- A. spruce tree                      B. green beans                      C. orange tree                      D. fern

4. Which of the following group of organisms is not a vertebrate?

- A. amphibians                      B. mammals                      C. mollusks                      D. birds

5. Which of the following is an angiosperm?

- A. oak tree                      B. fir tree                      C. fern                      D. mold

6. Humans belong in which classification?

- A. mammals                      B. animals                      C. vertebrates                      D. all of these

7. Bats belong in which classification?

- A. mammals                      B. birds                      C. invertebrates                      D. all of these

8. Which kind of plants produce flowers and fruit?

- A. nonvascular plants                      B. gymnosperms                      C. angiosperms                      D. conifers

9. Which of the following items contains spores?

- A. ferns                      B. sunflowers                      C. fir trees                      D. starfish

10. Which of the following is an example of a fungus?

- A. ferns                      B. mushrooms                      C. algae                      D. bacteria

11. Which of the following is an example of a spore-bearing nonvascular plant?

- A. apple tree                      B. yeast                      C. moss                      D. grass

12. Which of the following would not be produced from an angiosperm plant?

- A. an apple                      B. an acorn                      C. a rose                      D. a spore

13. Which of the five kingdoms consists of ONE celled organisms?

- A. plants                      B. animals                      C. fungi                      D. protists
