

Smelly Animals and Plants

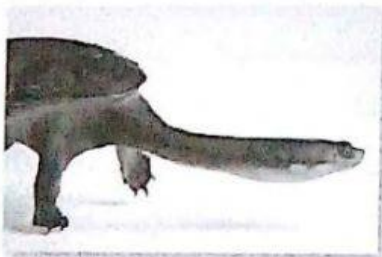

Lots of things smell nice. Apple trees, flowers and the sea all smell great. But some animals and plants smell terrible!

The Eastern snake-necked turtle lives in fresh water in eastern Australia. This turtle has got a really long neck that looks like a snake. If you catch an Eastern snake-necked turtle, it smells terrible. Some people think it smells like a skunk. In Australia, people call this turtle 'the stinker' because of its bad smell!

Flowers usually smell nice, but the rafflesia doesn't. It smells terrible! The rafflesia is the biggest flower in the world. It's almost one metre (three feet) wide. The rafflesia grows in southeastern Asia. The rafflesia smells like old meat. Flies like the smell, and they fly to the rafflesia flowers.
