

แบบฝึกหัด 1.5
เรื่อง การคูณจำนวนเต็ม

1) จงหาผลคูณในแต่ละข้อต่อไปนี้

$$1) 5 \times 3 = \underline{\hspace{2cm}}$$

$$3) (-4) \times 6 = \underline{\hspace{2cm}}$$

$$5) 5 \times 4 \times 2 = \underline{\hspace{2cm}}$$

$$7) (-8) \times 2 \times (-4) = \underline{\hspace{2cm}}$$

$$9) (-11) \times (-3) \times (-4) = \underline{\hspace{2cm}}$$

$$2) 9 \times (-3) = \underline{\hspace{2cm}}$$

$$4) (-6) \times (-8) = \underline{\hspace{2cm}}$$

$$6) 3 \times (-9) \times (-2) = \underline{\hspace{2cm}}$$

$$8) (-6) \times 3 \times 4 = \underline{\hspace{2cm}}$$

$$10) (-14) \times (-5) \times (-2) = \underline{\hspace{2cm}}$$

2) จงหาผลลัพธ์ในแต่ละข้อต่อไปนี้

$$1) 11 + 7 - (5 \times 2) = \underline{\hspace{2cm}}$$

$$2) (-27) - (13 \times 2) + 18 = \underline{\hspace{2cm}}$$

$$3) [5 \times (-2)] + [(-4) \times (-3)] = \underline{\hspace{2cm}}$$

$$4) (-9) \times 3 \times (5 - 4) = \underline{\hspace{2cm}}$$

$$5) 15 \times [(-5) \times 7] - 11 = \underline{\hspace{2cm}}$$
