

Camels are interesting animals. They usually live in the desert. This is because they don't need to drink a lot and they can live without water for two weeks. Also, they have fur over their ears and they can close their noses so that sand doesn't get in.

Camels usually live for about 40 to 50 years. They can run as fast as horses. Camels don't eat meat. They eat desert plants. These big animals have long necks so that they can eat the leaves of tall trees.

Camels can carry heavy things on their backs. People can use camels to carry them and their things across the deserts. People also use camels for their milk, wool and meat. You can also see them in the zoos all over the world.

Example: 0. Where do camels usually live?

- ☒ A. They usually live in the deserts.
- ☐ B. They usually live in the zoo.
- ☐ C. They usually live all over the world.

1. Why can camels live in the deserts?

- ☐ A. Because they can live without water for two weeks and don't need to drink a lot.
