a. which b. who c. what d. how

14. The bus _____ goes to the airport runs every hour.

a. which b. who c. whose d. what

IV. Read the passage and choose the best answer.

Skateboarding

The skateboard was created by a California surfer back in the 1950s. He attched roller skate wheels to a piece of wood that resembled a small surfboard so that he could surf on land as well as on the ocean. Since then, skateboarding has become a sport, an art form and a speedy mode of transportation. Today, many young people compete in skateboarding competitions, where they show off their skills and special tricks. Some cities, however, "No skateboarding" signs in certain areas where there is high pedestrian traffic so that no one gets injured. The fastest stand-up speed recorded on a skateboard was locked at 55 miles per hour. In many palces, that's the freeway speed limit for cars! In some places skateboarder are issued citations for skating too fast on public sidewalks and streets.

1. When was the first skateboard created?

a. in the 1960s b. in the 1950s c. in the 1970s
