

# The Skeleton

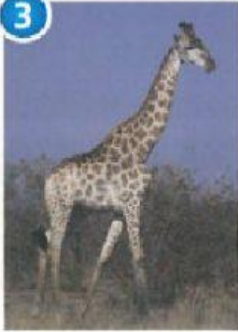

Human and some animals have got the skeletons.  
The skeleton helps us to swim, walk, run, sit and stand.

Fill in the blanks space below.

|      |       |     |
|------|-------|-----|
| swim | walk  | run |
| sit  | stand |     |

|                                                                                     |                                                                                     |                                                                                      |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
|   |   |  |
|                                                                                     |                                                                                     |                                                                                      |
|  |  |                                                                                      |
|                                                                                     |                                                                                     |                                                                                      |

Look and match animals with their skeletons.

|                                                                                    |                                                                                    |                                                                                     |
|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|   |   |  |
|                                                                                    |                                                                                    |                                                                                     |
|  |  |                                                                                     |
|                                                                                    |                                                                                    |                                                                                     |
